

TABLE OF CONTENTS

| | |
|------------------------------------------------------------------|------|
| Personnel | vi |
| Publications and Reports | xi |
| Introduction | xvii |
| | |
| I. Physical Electronics | 1 |
| Physical Electronics in the Solid State | 1 |
| Surface States on Semiconductors | 1 |
| Characteristics of Semiconductor Junctions | 2 |
| | |
| II. Microwave Gaseous Discharges | 5 |
| Normal Wave Surfaces For Electromagnetic Waves in a Plasma | 5 |
| Microwave Radiation from Plasmas | 14 |
| Electromagnetic Wave Propagation in a Bounded Anisotropic Plasma | 18 |
| Microwave Load Curves for Plasma-Loaded Cavities | 23 |
| Microwave Radiation from a Plasma in a Magnetic Field | 26 |
| A Limitation of RF Confinement | 31 |
| Plasma Diamagnetism | 32 |
| | |
| III. Plasma Dynamics | 36 |
| Magnetically Driven Shock Tube Studies | 36 |
| Channeling and Compression of a Plasma Beam | 41 |
| | |
| IV. Solid State Physics | 42 |
| Recombination of Electrons and Donors in Germanium | 42 |
| M-Emission Bands of Copper and Nickel in the Solid State | 44 |
| | |
| V. Thermoelectric Processes and Materials | 47 |
| Anisotropic Thermoelectric Effects | 47 |
| Experiments with Bismuth Telluride | 47 |
| Thermal Conductivity Studies | 49 |
| Transport of Contact Materials in Bismuth Telluride | 50 |

CONTENTS

| | | |
|-------|------------------------------------------------------------------------------------------------------------|-----|
| VI. | Microwave Spectroscopy | 52 |
| | Noise Spectrum of Phase-Locked Oscillators | 52 |
| | The Number of F-Centers in Quartz | 54 |
| | Antiferromagnetic Resonance in Manganous Chloride | 55 |
| | Paramagnetic-Resonance Spectrum of Ruby at Low Magnetic Fields | 57 |
| | Phonon-Spin Absorption in Paramagnetic Crystals | 57 |
| | Interaction of Paramagnetic Spins with Lattice Phonons | 58 |
| VII. | Nuclear Magnetic Resonance and Hyperfine Structure | 61 |
| | Nuclear Magnetic Resonance | 61 |
| | Nuclear Spin Interactions in Molecules | 61 |
| | Molecular Motion in Solids | 62 |
| | Dependence of Hyperfine-Structure Anomalies for $S_{1/2}$ Electrons on the Nuclear Charge Distributions | 63 |
| | The Ultraviolet Output of Capillary Mercury Arc Lamps | 67 |
| | Carrier-Free Production of Isotopes without Transmutation | 72 |
| | Hollow-Cathode Discharge Tubes for Use with Small Quantities of Source Materials | 72 |
| | A Magnetic-Scanning Experiment | 73 |
| VIII. | Microwave Electronics | 75 |
| | Klystrons | 75 |
| | Stagger-Tuned Klystrons | 75 |
| | High-Efficiency Bunching (The Squeezer) | 75 |
| | Noise in Electron Beams | 75 |
| | Microwave Circuits | 78 |
| | Resonating Obstacles for Cylindrical-Waveguide Delay Line | 78 |
| | Coupling of Modes in Uniform Composite Waveguides | 80 |
| IX. | Statistical Communication Theory | 84 |
| | Approximations to Nonlinear Systems | 84 |
| | Application of Transform Theory to Continuous Nonlinear Systems | 98 |
| | Continuous Nonlinear Systems with Gaussian Inputs | 104 |
| | Maximum Signal-to-Noise Ratio Estimation | 108 |
| | An Upper Bound on Tree Probability in a Probabilistic Graph | 113 |
| | Some Criteria in Pulse Transmission Problems | 117 |

CONTENTS

| | | |
|-------|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| X. | Process Analysis and Synthesis | 130 |
| | A Machine That Constructs Photographic Replicas of Coded Figures | 130 |
| | Electronic Curve Tracing | 132 |
| XI. | Processing and Transmission of Information | 138 |
| | Picture Processing | 138 |
| | Sampling Theorems for Linear Time-Variant Systems | 140 |
| | Parity-Check Codes with Limited Constraints Per Digit | 140 |
| | Switching Circuits with Multiple-Hole Magnetic Cores | 148 |
| XII. | Statistical Thermodynamics | 149 |
| | The Differential Geometrical Formalism of Thermostatistics | 149 |
| XIII. | Physical Acoustics | 152 |
| | Nonlinear Distortion of Sound Waves in Liquid Helium | 152 |
| | Acoustic Attenuation in the Vicinity of an Order-Disorder Transition in a Copper-Gold Alloy (Cu_3Au) | 155 |
| | Attenuation of Sound in Aluminum | 157 |
| | Scattering of Sound by Sound | 158 |
| | Sound Source Near a Velocity Discontinuity | 159 |
| XIV. | Speech Communication | 161 |
| | Automatic Resolution of Speech Spectra into Elemental Spectra | 161 |
| | Perception of Speech-Like Sounds | 167 |
| | The Loudness of Sounds in the Presence of a Masking Noise | 171 |
| XV. | Communications Biophysics | 172 |
| | Quantitative Methods in the Analysis of Neuroelectric Activity | 172 |
| | Comparison of EEG Activity Recorded from Homologous Locations on the Scalp by Means of Autocorrelation and Crosscorrelation Analysis | 173 |
| | Psychoacoustic Study of the Mechanism of Binaural Fusion | 181 |
| XVI. | Neurophysiology | 189 |
| | Infallible Nets of Fallible Formal Neurons | 189 |
| | Physiological Evidence That Cut Optic Nerve Fibers in a Frog Regenerate to Their Proper Places in the Tectum | 197 |
| XVII. | Circuit Theory | 200 |
| | Nonlinear Reactance Frequency Multipliers | 200 |
| | A Numerical Method for Computing Pole and Zero Locations | 201 |
