Publications and Reports xiii

Introduction xviii

## GENERAL PHYSICS

### I. Molecular Beams
- Evaporation of Neutral Atoms from He II Stimulated by Heat Pulses 1
- Correction of the Spherical Aberration of Electron Microscope Objective Lenses using Transparent Foils 6
- An Acoustic Means of Detecting an Electron-Proton Charge Difference 11

### II. Radio Astronomy
- Formaldehyde Absorption in Three Dark Galactic Clouds 21
- Stellar Interferometer 25
- Infrared Transmission of CO₂ and N₂O 27

### III. Physical Electronics and Surface Physics
- Diffraction of Helium Atoms from a Tungsten (112) Crystal Surface 33
- Experimental Measurements of the Speed Distributions of Deuterium Molecules Desorbed from Nickel Surfaces 39

### IV. Physical Acoustics
- Generalized Sound Modes in Gases 51
- Acoustical Properties of Lanthanum Flint Glass 53
- Frequency Mixing of Sound in a Nonlinear Orifice 54

### V. Electrodynamics of Media
- Transversely Excited Atmospheric (TEA) Gain Studies 59

QPR No. 102 iii
CONTENTS

PLASMA DYNAMICS

VI. Plasmas and Controlled Nuclear Fusion
   Plasma Diagnostics
      Stark Profiles of Forbidden and Allowed Transitions in a
      Dense, Laser-Produced Helium Plasma
   Feedback Stabilization
      Nonlinear Feedback Control for Alcator
      On the Requirements for Feedback Stabilization of Kink
      Modes in a Current-Carrying Plasma
   High-Temperature Toroidal Plasmas
      Alcator Lower Hybrid-Heating Experiment

COMMUNICATION SCIENCES AND ENGINEERING

VII. Processing and Transmission of Information
   Search Lengths in File Systems with Directories

VIII. Speech Communication
   Physiology of Speech Production: A Preliminary Study of Two
      Suggested Revisions of the Features Specifying Vowels
   Computer-Generated Spectrograms and Cepstrograms

IX. Cognitive Information Processing
   Estimates of the Human Visual Line-Spread and Point-Spread
      Functions
   Transformations on Digitized Pictures using Local Parallel
      Operators

X. Communications Biophysics
   Effects of Electric Stimulation of the Crossed Olivocochlear
   Bundle on Cochlear Microphonic Potential
   System for Displaying Calibrated Velocity Waveforms of
   Structures in the Ear Using the Mössbauer Effect

XI. Neurophysiology
   Activity Dependent Shifts in Excitability of Frog Peripheral
      Nerve Axons

XII. Signal Processing
   Optimal Linear Filter for Estimation of Group Time of Arrival
   Reconstruction of Two-Dimensional Signals from Projections
