Publications and Reports xv

Introduction xix

GENERAL PHYSICS

I. Molecular Beams 1
   Stimulated Desorption by Low-Energy Electrons 2
   Superfluid Helium Critical Velocity Model 5
   Detection of Quantized Vortex Lines in Superfluid Helium at a Known Pinning Site 6
   Survival of Frog Skin Exposed to Vacuum 11
   Design of an Achromatic Combined Electron Mirror and Accelerating Lens 17

II. Microwave Spectroscopy 21
   Work Completed 22
      Low-Temperature Behavior of Radio-Frequency Surface Impedance in Metals 22
   Work in Progress 23
      Propagating Waves on a High Dielectric Slab 23

III. Atomic Resonance and Scattering 29
   Van der Waals Molecules 30
   Magnetic Moment of the Deuteron 32
   Diamagnetic Shielding of H₂ 35
   Interactions in the Excited State 38

IV. Radio Astronomy 39
   Radio Observations of Scorpius X-1 41
   Continuum Radio Structure of the Galactic Disk 47
   M.I.T. Three-Element Interferometer 50
   21-Centimeter VLBI Observations of Pulsars 51
   New H₂O Sources Associated with Infrared Stars 53
   Observations of High-J Atmospheric O₂ Lines at Arecibo Observatory 59

V. Low-Temperature Millimeter Wave Receivers 61

CONTENTS

XIV. Gaseous Electronics
   Stimulated Ultraviolet Emission from a Plasma 127
   Production of Plasma by Laser Breakdown 144

XV. Relativistic Beams 151

XVI. Applied Plasma Research
   Active Plasma Systems 153
      Observations of Nonlinear Interactions in a Beam-Plasma System 154
      Analytic Studies of Nonlinear Plasma Problems by Symbolic Manipulation Programs on a Computer 167
   Plasma Physics and Engineering 186
   Plasma Effects in Solids 188
      Surface Mobility on Silicon from Acoustoelectric Current Measurements 188
   Laser-Plasma Interactions 195
      Optical Frequency Mixing in a Plasma 195
      Plasma Dispersion Function: Application to Lamb Dip 208

COMMUNICATION SCIENCES AND ENGINEERING

XVII. Processing and Transmission of Information 217
   A Near-Optimum Receiver for the Binary Coherent State Quantum Channel 219
   Statistically Dependent Quantum Systems: The Paradox of Einstein, Podolsky, and Rosen 225

XVIII. Detection and Estimation Theory 231
   An Integrated Approach to the Estimation of the Dynamics of a Moving Source by a Passive Observer 232

XIX. Speech Communication 245
   Further Theoretical and Experimental Bases for Quantal Places of Articulation for Consonants 247
   Durational Characteristics of Prestressed Word-Initial Consonant Clusters in English 253
   Speaker Recognition and Verification Using Linear Prediction Analysis 261

QPR No. 108
CONTENTS

XX. Linguistics 269
   A Revised Directional Theory of Rule Application in Phonology 270
   Clause Structure and the Perceptual Analysis of Sentences 277
   Formal Properties of Lexical Derivations 280
   Nonglobal Rules in Klamath Phonology 288

XXI. Cognitive Information Processing 311

XXII. Communications Biophysics 317
   Cochlear Potential Response at the Round-Window Membrane of the Cat 323
   Neural Responses of Lateral-Line Organs in Necturus Maculosis to Direct Mechanical Stimulation 332
   An Optimum Processor Theory for the Central Formation of the Pitch of Complex Tones 338

XXIII. Neurophysiology 345

XXIV. Signal Processing 347
   Localization of Sound in Space in the Vertical Median Plane 349
   Simulation of Auditory Signals for Localization 352

Author Index 353
