TABLE OF CONTENTS

Personnel vi
Publications and Reports xiv
Introduction xix

GENERAL PHYSICS

I. Molecular Beams 1
   Comparison of Techniques for Surface Measurements 1

II. Radio Astronomy 5
   Interferometric Survey of the Radio Emission of Normal Galaxies 5
   Further Results from the Nimbus-5 Microwave Spectrometer Experiment 7
   Microwave Emission from Atmospheric Oxygen 11

III. Electrodynamics of Media 21
    Model of Mode Locking with Saturable Absorber 21
    Inversion Growth in an HF Laser Amplifier II 24
    Electromagnetic Waves in Layered Biaxial Media 34
    Radiation Patterns of Electric Dipoles over Anisotropic Half-Space 38

PLASMA DYNAMICS

IV. Plasmas and Controlled Nuclear Fusion 45
    Waves and Radiation 45
    Calculation of Some Coupling Coefficients for the Interaction of Two Electromagnetic Waves with an Electrostatic Wave in a Plasma 45
    Effect of Plasma Turbulence upon an Optical Transition Having a Nearby Forbidden Component 55

V. Gaseous Electronics 59
    High-Pressure TEA CO₂ Laser 59
    High Repetition Rate TEA CO₂ Laser 62
    Stimulated Emission from High-Pressure Rare Gas Plasmas 65
CONTENTS

VI. Applied Plasma Research 79
   Active Plasma Systems 79
      Dispersion Relations (Wave Number vs Density) for Warm-Plasma Modes near Lower Hybrid Resonance 79
      Symbolic Computation of Nonlinear Wave-Wave Interactions 86
      Parametric Excitation of Ion Waves by Waves near the Lower Hybrid Frequency 104
   Laser-Plasma Interactions 118
      Generation and Amplification of High-Intensity, Nano-second TEA CO₂ Laser Pulses 118
      Laser-Induced High-Frequency Stark Effect in a Plasma 122
      CO₂ Short-Pulse Amplification Studies 127

COMMUNICATION SCIENCES AND ENGINEERING

VII. Processing and Transmission of Information 137
   Constraints Imposed by the Law of Conservation of Energy on Possible Forms of Interaction Hamiltonians 137
   Realization of an Optimum Quantum Measurement by Extension of Hilbert-Space Technique 140
   On the Optimum Quantum Receiver for the M-ary Linearly Independent Pure State Problem 142
   Computer Updating of a Data Structure 147

VIII. Speech Communication 155
   Potential Role of Property Detectors in the Perception of Consonants 155
   Measurement of Vibration Patterns of Excised Larynxes 169

IX. Linguistics 177
   Clause Boundary and Dominance Effects on Sentence Perception 177

X. Communications Biophysics 183
   Design of Nursing-Home Telemedicine Systems 184

XI. Neurophysiology 185
   Synthesis of Acetylcholine and Gamma-Aminobutyric Acid in the Tectum of the Tiger Salamander, Ambystoma tigrinum 185

QFR No. 110
CONTENTS

XII. Signal Processing
   Rapid 1/3 Octave Pinna Response Measurements  189

Author Index  191

Research Support Index  192
