Special issue on DISC 2010

Nancy A. Lynch · Alexander A. Shvartsman

Published online: 1 June 2013
© Springer-Verlag Berlin Heidelberg 2013

This special issue of Distributed Computing is based on papers that originally appeared as extended abstracts in the Proceedings of the 24th International Symposium on Distributed Computing (DISC2010), held in Cambridge, Massachusetts on August 13–15, 2010. The papers for the Special Issue were chosen by the Program Committee from the 32 regular papers presented at the Symposium, based on their quality and representation of the spectrum of

topics encompassed by the Symposium. In addition to being reviewed, in preliminary form, by the Program Committee, the full papers submitted for the Special Issue were refereed according to the standard practices of Distributed Computing (due to time constraints, some papers could not appear in this volume). We thank the Members of the Editorial Board for their work in editing this issue, and the referees and the authors of these papers for their respective contributions.
