

TABLE OF CONTENTS

Personnel	v
Publications and Reports	vii
Introduction	viii
I. Physical Electronics	1
A. Electron Emission Problems	1
1. Work Functions and Electrical Conductivity of Oxide-Coated Cathodes	1
2. Determination of the Thermionic-Emission Properties of Single Tungsten Crystals by a Photometric Method	1
3. Determination of the Field-Emission Properties of Single Tungsten Crystals by a Photometric Method	2
B. Studies with Gaseous Discharges	2
1. Hot Cathode Arc in Cesium Vapor	2
C. Experimental Techniques	3
1. Spectral Emissivity of Tungsten	3
2. Ionization Gauge and High-Vacuum Studies	4
3. Survey of Methods Used to Determine the Optical Properties of Phosphors	4
II. Microwave Gaseous Discharges	5
A. A-C Breakdown	5
B. Microwave Breakdown in Helium	6
C. Transient-Discharge Characteristics: Ambipolar Diffusion and Electron-Ion Recombination	9
III. Solid State Physics	
A. Properties of Matter at Low Temperatures	12
1. Helium Liquefiers	12
2. Microwave Surface Impedance of Normal Conductors	13
3. Microwave Surface Impedance of Superconductors	14
4. Elastic and Inelastic Behaviour of Metals at Low Temperatures	15
5. Magnetic Cooling	16
6. Theory of Liquid Helium	16
B. High-Frequency Ultrasonics	17
C. Phase Transitions	17
D. Ultrasonic Scattering	18
E. A Vacuum Spectrograph	18
IV. Radio-Frequency Spectroscopy	19
A. Molecular-Beam Research	19
1. Theory of Nuclear Effects in Microwave Spectra	19
2. Theory of Nuclear Electric Quadrupole Moments	19
B. Magnetic Nuclear Resonance	21
1. Nuclear Resonances at Low Temperatures	21
1. Nuclear Resonances at Room Temperatures	21
3. Deuteron-Proton Moment Ratio	21
C. Paramagnetic Relaxation	22
1. Resonance Absorption	22
2. Absorption in the Absence of a Static Magnetic Field	22
D. Microwave Spectroscopy	22
1. General	22
2. Spin of Boron	23
3. Hyperfine Structure of Atomic Hydrogen	24
4. The Asymmetric Rotor	25
V. The Linear Accelerator Program	26

VI.	Magnetron Development	31
	A. Ten-Megawatt Magnetron	31
	B. Ceramic Windows	33
	C. Thoria Cathodes	33
	D. Mode Stability	34
	E. Noise Generation in the Pre-Oscillating Magnetron	36
	F. Steady-State Space-Charge Distribution in a Magnetron	37
	G. Noise Properties of the "Non-Oscillating" Magnetron	37
VII.	Traveling-Wave Tubes	39
	A. Three-Cm Traveling-Wave Amplifier Tubes	39
	1. Helix Studies	39
	2. Redesign of 3-Cm Traveling-Wave Tube	41
	B. Velocity-Modulated-Input Traveling-Wave Amplifier	41
	C. Eight-Mm Traveling-Wave Oscillator	42
VIII.	Communications Research	44
	A. Multipath Transmission	44
	1. Speech and Music	44
	2. Television	45
	B. Microwave Modulation Techniques	45
	1. Double-Tuned Oscillators	45
	2. Investigation of Frequency Modulation, Reflex Klystron	47
	3. Magnetron Reactance Tube	48
	C. Statistical Theory of Communication	48
	1. Autocorrelation Function	48
	a. Autocorrelation Functions of Random Noise	48
	b. Digital Electronic Correlator	54
	2. Probability Distributions	56
	3. Optimum Prediction	57
	4. Theory of the Transmission of Information	58
	5. Pulse Modulation	58
	6. Storage of Pulse-Coded Information	58
	7. "Felix" (Sensory Replacement)	61
	8. Low-Frequency Output Spectrum of Lock-In Amplifier	61
	9. Pulse Code Magnetic Recorder	64
	D. Transient Problems	65
	1. Envelope Studies	65
	2. Transient Theories	65
	3. Synthesis of Networks for Specific Transient Response	65
	E. Active Networks	65
	1. General Theory	65
	2. Broadband Amplifiers with Active Interstages	66
	3. Sinusoidal Oscillations in Nonlinear Systems	70
	F. Higher Mode Problems	71
	1. Steady-State Propagation of Electromagnetic Waves Along Cylindrical Structures	71
	2. Techniques for Millimeter-Wave Transmission	73
	G. Locking Phenomenon in Microwave Oscillators	74
IX.	Miscellaneous Problems	75
	A. Electronic Differential Analyzer	75
	1. Computing Elements	75
	2. Differential Equations	75
	B. An Automatic Impedance-Function Analyzer	77
	1. Analysis of the Errors in the Method	77
	2. Commutator Construction	77
	3. Construction of the Mk. 4 Machine	78
	C. Proton-Velocity Meter	78
	D. Electronic-Potential Mapping	78
	E. Tube Laboratory	79
	1. Resistance Thermometer for Temperature Control	79
	F. Tube Laboratory - (Chemical Section)	81
	1. Aluminum Bonds to Glass, Quartz and Steatite	81
