

TABLE OF CONTENTS

| | |
|--|-----|
| Publications and Reports | v |
| Personnel | vii |
| Introduction | ix |
| I. Physical Electronics | 1 |
| A. Electron-Emission Problems | 1 |
| 1. Work Functions and Electrical Conductivity of Oxide-Coated Cathodes | 1 |
| 2. Determination of the Thermionic-Emission Properties of Single Tungsten Crystals by a Photometric Method | 2 |
| 3. Determination of the Field-Emission Properties of Single Tungsten Crystals by a Photometric Method | 2 |
| 4. Energy Distribution of Electrons from Ultrafine-Grain Oxide Cathodes | 2 |
| 5. Investigation of Certain Properties of Oxide-Coated Cathodes Using Radioactive-Tracer Techniques | 3 |
| 6. Studies of the Phenomenon of Standby Deterioration of Oxide-Coated Cathodes | 3 |
| 7. Studies of Photoelectric Emission | 3 |
| B. Studies With Gaseous Discharge | 4 |
| 1. Hot-Cathode Arc in Cesium Vapor | 4 |
| 2. Investigation of Low-Pressure Mercury Arcs | 5 |
| C. Experimental Techniques | 5 |
| 1. Spectral Emissivity of Tungsten and Tantalum | 5 |
| 2. Ionization Gauge and High-Vacuum Studies | 5 |
| II. Microwave Gaseous Discharges | 7 |
| A. Breakdown of Oxygen, Nitrogen and Air | 7 |
| B. Breakdown with Pulsed Fields | 8 |
| C. Measurement in Helium Gas with a Liquid Helium Trap | 10 |
| D. Transient Discharge Characteristics | 11 |
| E. An Error in a Paper by Landau on Coulomb Interactions in a Plasma | 17 |
| III. Solid State Physics | 19 |
| A. Critical Point Fluctuations | 19 |
| B. Vacuum Spectrograph | 19 |
| C. Theory of Liquid Helium | 19 |
| IV. Low-Temperature Physics | 21 |
| A. Helium Liquefiers | 21 |
| 1. Intermediate Supply of Liquid Helium | 21 |
| B. Microwave Surface Impedance of Superconductors | 23 |
| C. Magnetic Cooling | 23 |
| D. X-Ray Study of Superconductors | 23 |
| E. Second Sound Velocity | 24 |
| V. Radio-Frequency Spectroscopy | 26 |
| A. Molecular-Beam Research | 26 |
| 1. Third Molecular-Beam Apparatus | 26 |
| 2. Nuclear Spin and Hyperfine Structure of Cs ¹³⁵ and Cs ¹³⁷ | 26 |
| 3. The Fourth Atomic-Beam Apparatus | 26 |
| 4. An Electron Bombardment Ionizer | 26 |
| B. Nuclear Magnetic Resonance | 27 |
| 1. Nuclear Magnetic Moments and Hyperfine Structure of the Rubidium Isotopes | 27 |
| 2. Nuclear Magnetic Moments of Rb ⁸⁷ and Rb ⁸⁵ | 28 |
| 3. The Magnetic Moment of Be ⁹ | 28 |
| 4. The Nuclear Resonance of Li ⁶ | 29 |
| 5. Deuteron-Proton Moment Ratio | 29 |
| 6. Nuclear Magnetic Moment Values | 30 |
| C. Paramagnetic Relaxation | 32 |
| 1. Resonance Absorption | 32 |
| 2. Relaxation | 32 |
| 3. Low-Temperature Resonance | 32 |

| | | |
|-------|--|----|
| D. | Microwave Spectroscopy | 32 |
| 1. | Germane Monochloride | 32 |
| 2. | Ketene | 33 |
| 3. | Formaldehyde | 33 |
| 4. | Oxygen | 34 |
| 5. | Apparatus | 34 |
| VII. | The Linear-Accelerator Program | 36 |
| VIII. | Magnetron Development | 37 |
| A. | High-Power 10.7-Cm Magnetron | 37 |
| 1. | Testing and Design | 37 |
| 2. | Thoria Cathodes | 38 |
| 3. | Auxiliary Equipment | 38 |
| a. | 20-Megawatt Pulse Transformer | 38 |
| b. | New Vacuum System | 39 |
| B. | Magnetron Research | 39 |
| 1. | Mode Stability | 39 |
| 2. | Noise Properties of the Pre-Oscillating Magnetron | 39 |
| IX. | Traveling-Wave Tubes | 40 |
| A. | Three-Cm Traveling-Wave Amplifier Tubes | 40 |
| 1. | Glass-Wool Helix Supports | 40 |
| 2. | Helix Supported by Glass Sheath | 40 |
| 3. | Gun Design | 42 |
| B. | Velocity-Modulated-Input Traveling-Wave Tube | 42 |
| C. | Low-Voltage Three-Cm Traveling-Wave Amplifier | 46 |
| 1. | Helix Assembly | 46 |
| 2. | Gun Design | 46 |
| D. | Dense Electron Beams in Axial Magnetic Fields | 47 |
| X. | Communications Research | 48 |
| A. | Multipath Transmission | 48 |
| 1. | Speech and Music | 48 |
| a. | Automatic Volume Control | 48 |
| b. | Comparison with Present Techniques | 49 |
| c. | Study of a Commercial FM Receiver | 50 |
| 2. | Television | 51 |
| B. | Microwave Modulation Techniques | 53 |
| 1. | Investigation of Frequency Modulation of a Reflex Klystron | 54 |
| C. | Statistical Theory of Communication | 56 |
| 1. | Auto-Correlation Functions | 56 |
| a. | Correlation Functions | 56 |
| b. | Auto-Correlation Functions of Random Noise | 56 |
| c. | Digital Electronic Correlator | 56 |
| 2. | Amplitude and Conditional Probability Distributions of a Quantized Time Function | 57 |
| 3. | Optimum Prediction | 59 |
| 4. | Techniques of Optimum Filter Design | 59 |
| 5. | Pulse-Modulation Studies | 61 |
| 6. | Storage of Pulse-Coded Information | 61 |
| 7. | "Felix" (Sensory Replacement) | 62 |
| a. | Bank Filters with Variable Bandwidth | 63 |
| 8. | Clipped Speech Studies | 64 |
| 9. | Pulse-Code Magnetic Recorder | 64 |
| 10. | Statistical Investigation of Modulation Systems | 68 |
| D. | Transient Problems | 69 |
| 1. | Transient Theories | 69 |
| E. | Active Networks | 73 |
| 1. | Broadband Amplifiers | 73 |
| F. | Locking Phenomena in Microwave Oscillators | 73 |
| XI. | Miscellaneous Problems | 74 |
| A. | Electronic Differential Analyzer | 74 |
| 1. | Computing Elements | 74 |
| 2. | Differential Equations | 74 |
| 3. | Integral Equations | 74 |
| B. | An Automatic Impedance-Function Analyzer | 75 |
| 1. | Construction of the Mark 4 Machine | 76 |
| 2. | Method of Use | 77 |
| C. | Electronic-Potential Mapping | 78 |
| D. | Hydrogen Arc Ultra-Violet Source | 80 |
