

TABLE OF CONTENTS

Personnel		vi
Publications and Reports		ix
Introduction		xiii
I.	Physical Electronics	1
	Electron Emission Problems	1
	Thermionic Emission from a Planar Molybdenum Crystal	1
	Physical Electronics in the Solid State	3
	Hall Effect in Lead-Sulfide Films	3
	Surface States on Semiconductors	3
	Temperature Dependence of the Resistance of Germanium P-N Junctions	4
	Experimental Techniques	4
	Spectral Emissivity of Tungsten	4
	High-Vacuum Studies	4
II.	Microwave Gaseous Discharges	7
	Plasma Oscillations	7
	Nonuniform Electric Fields	10
	Pulsed Breakdown	13
	Magnetic Field Studies	16
	Highly Ionized Microwave Plasma	17
III.	Solid State Physics	20
IV.	Microwave Spectroscopy	22
	Molecular-Beam Microwave Spectroscopy	22
	Paramagnetic Resonance	25
	The Versitron	25
	Micromodulator	26
V.	Nuclear Magnetic Resonance and Hyperfine Structure	27
	Some Interrelations of the Magnetic Sublevels of Hyperfine-Structure Lines	28
	Intermediate Coupling in Nuclear Resonance Spectra	29
	The Free Electron Model for Chemical Shifts	30
VI.	Microwave Electronics	31
	Limiting Noise Figure of a Microwave Tube with a Beam of Finite Diameter	32
	Cavity-to-Helix Coupling	36
	Hollow-Beam Focusing	37
	Hollow-Beam Gun Design	39
	Low-Q Cavity Design	40
	Multicavity Klystrons	40

CONTENTS

VII.	Atomic Beams	50
	Frequency Stabilization of K-Band Klystrons	50
VIII.	Stroboscopic Research	52
IX.	Frequency Modulation Studies	53
X.	Statistical Communication Theory	54
	Analytic Nonlinear Systems	54
	Invariance of Correlation Functions under Nonlinear Transformations	61
	Representation and Synthesis of Certain Linear Operators	65
	Convergence Properties of Sequences of Singular Networks	70
	Time-Limited and Band-Limited Functions	72
	Analog Probability Density Analyzer	75
	On the Synthesis of Linear Systems for Pure Transmission, Delayed Transmission, and Linear Prediction of Signals	77
XI.	Process Analysis and Synthesis	101
XII.	Processing and Transmission of Information	108
	A New Mode of Operation for Sequential Switching Circuits	108
XIII.	Transistor Circuits	112
XIV.	Noise in Electron Devices	113
	An Extension of the Noise Figure Definition	113
	Canonical Form of a Noisy Linear n Terminal-Pair Network	117
XV.	Speech Analysis	120
XVI.	Mechanical Translation	121
XVII.	Communications Biophysics	122
	Detection of Responses to Clicks in Awake Subjects by an Averaging Procedure	123
	The Pacing of EEG Potentials of Alpha Frequency by Low Rates of Repetitive Flash in Man	127
	Correlators for the Investigation of Neuroelectric Activity	130
XVIII.	Neurophysiology	135
	Recent Work	135
	Instrumentation	137
XIX.	Circuit Theory	138
	Some Limitations of Amplifying Devices	138
	Piecewise-Linear Network Theory	143

CONTENTS

XX.	Network Synthesis	144
	Transient Correction with All-Pass Networks	144
	Geometric Interpretation of Gewertz's Stability Condition Using the Isometric Circles	146
XXI.	Microwave Theory	149
	The Isometric Circle Method in Analytical Form	149
	Graphical Determination of the Efficiency of Bilateral, Two Terminal-Pair Networks	152
XXII.	Mathematics	155
	On Effective Computability	155
	A New Inequality in Communication Theory	155
	Valuated Algebras	156
