

## TABLE OF CONTENTS

Personnel	vii
Publications and Reports	xiv
Introduction	xxiii
I. Physical Electronics	1
Ionization of Cesium at Surfaces	1
The Energy Distribution for Electrons in a Thermionic Diode Cannot Be Truly Maxwellian	1
II. Microwave Spectroscopy	3
A Search for Possible Superconductivity in Thin Films of Rare Earth Metals	3
Properties of Superposed Superconducting Thin Films	3
Measurement of the 1-1 Inversion Frequency of NH <sub>3</sub> and Experiments with a Two-Cavity Maser	3
Experiments with Microwave Phonons	4
III. Optical and Infrared Masers	5
Status of Research	5
IV. Nuclear Magnetic Resonance and Hyperfine Structure	11
Corkscrew Instability	11
High-Power Solenoid Electromagnet	12
Quadrupole Magnet and Transverse-Field Magnet for Plasma Studies	14
Hyperfine Structure and Isotope Shifts in Hg <sup>195</sup> , Hg <sup>195*</sup> , Hg <sup>194</sup> , and Hg <sup>193*</sup>	18
A Perturbation Solution of the Equation of Motion for the Density Matrix	19
Local Energy Balance of the Electron Gas in a Spherical Plasma	19
V. Microwave Electronics	25
High-Perveance Hollow Electron-Beam Study	25
Kinematic Theory of Gap Interaction for Relativistic Electron Beams	29
Hollow Electron Beams from Hollow Cathodes	33
VI. Molecular Beams	37
Cesium Beam Tube Investigation	37
Measurement of Frequency Stability	38
Varactor Multiplier Studies	38
Superconducting Lead Cavity	41
Measurement of the Velocity of Light	42

## CONTENTS

VII.	Radio Astronomy	49
	Millimeter Radio Telescope	49
	Atmospheric Water-Vapor Resonance Line Profile	52
	A New Upper Limit to the Galactic Deuterium-to-Hydrogen Ratio	56
	Project Luna See	60
VIII.	Physical Acoustics	67
	Magnetohydrodynamic Instabilities in a Low-Density Liquid Conductor	67
	Generation of Shock Waves by Exploding Wires	68
	Magnetically Driven Shock Waves in Solid Conductors	69
	Sound Propagation in $\text{Cu}_3\text{Au}$	69
	Field Measurements of Sound Propagation over Ground	69
IX.	Noise in Electron Devices	71
	Optimum Noise Performance	71
Plasma Dynamics		
X.	Plasma Physics	79
	Negative Conductivity	79
	Electron Temperature Decay in Helium Plasma Afterglow	83
	Electron Energies from the Langevin Equation	86
	Harmonics of Electron-Cyclotron Emission from Low and Intermediate Pressure Discharges	91
	One-Megacycle Bridge for Plasma Measurements	98
	Dispersion Relation for Longitudinal Plasma Waves	100
	Comments on Plasma Constriction	107
XI.	Plasma Electronics	111
	Energy and Power in Media with Temporal and Spatial Dispersion	111
	Electron Beam-Plasma Interaction Experiments	116
	A Magnetohydrodynamic Small-Signal Power Theorem	123
	Magnetohydrodynamic Generalization of Kelvin's Theorem	127
	The Effect of Internal Currents on the Plasma Density Distribution	129
	Production of Ion Beams	137
	Large-Volume Superconducting Solenoid	139
	Energy Extraction Blanket for a Fusion Reactor	142
	Design and Construction of Pulsed Plasma Accelerator	151

## CONTENTS

XII. Plasma Magnetohydrodynamics and Energy Conversion	165
An Electrodynamic Amplifier for a Low-Conductivity Plasma	165
A Criterion and an Experiment for the Observation of Electrohydrodynamic Antishocks	173
Space-Charge Distributions, Instabilities, and Oscillations in a Low-Pressure Diode	179
Communication Sciences and Engineering	
XIII. Statistical Communication Theory	187
Work Completed	187
Methods of Determining Coefficients for Optimum Systems	187
Synthesis of Several Sets of Orthogonal Functions	187
Threshold Study of Phase-Locked Loops	187
A Two-State Modulation System	187
Design of Filters for Non Mean-Square-Error Performance Criteria by Means of a Continuous Adjustment Procedure	189
Nonlinear No-Memory Filters of a Prescribed Form	201
Methods of Determining Coefficients for Optimum Systems	211
Synthesis of Several Sets of Orthogonal Functions	218
XIV. Processing and Transmission of Information	229
Picture Processing	229
Sequential Encoding of a Binary Source with a Distortion Measure	231
Coding for Discrete Memoryless Two-Way Channels	239
Encoding Circuits for Convolutional Codes	253
Threshold Decoding of Convolutional Codes	257
Error Detection and Correction for a Two-Way Channel	266
Coding for Printed English	270
XV. Speech Communication	275
An Automatic Spectrum Matching Program	275
Data Derived by an Automatic Spectrum Matching Program	278
Errata	282
XVI. Signal Detection by Human Observers	283
Masking with Two Continuous Tones	283

## CONTENTS

XVII.	Mechanical Translation	289
	On the Problem of Sentence Synonymy	289
XVIII.	Linguistics	295
	A Descriptive Convention for Treating Assimilation and Dissimilation	295
	The Proto-Slavic Diphthongs	296
XIX.	Communications Biophysics	299
	Components of the Responses Evoked by Stimulation of the Auditory Cortex of Anaesthetised Cats	299
	Some Response Characteristics of Single Units in the Cochlear Nucleus to Tone-Burst Stimulation	306
	Cortical Correlates of Behavioral States in the Rat	315
	Shape Recognition	320
	Switching-In Stimulus Analyzing Mechanisms	327
	Recognition, Recall, and Information	330
XX.	Neurophysiology	333
	Form-Function Relations in Neurons	333
	Olfaction	335
XXI.	Neurology	337
	Dynamics of the Human Lens System	337
	Single-Unit Responses in a Primitive Photoreceptor Organ	351
	Optokinetic Nystagmus in Man	366
	A Sampled-Data Model for Eye-Tracking Movements	370
	An Analytical Model of a Muscle Spindle Receptor for Simulation of Motor Coordination	384
	Transient Responses of Human Motor Coordination System	389
	Simultaneous Hand and Eye Tracking Movements	395
	Computer Analysis of Handwriting	401
	Pupillometry	404
	Re-evaluation of the Pupil System	412
	Analog Simulation of the Human Pupil System	420
XXII.	Sensory Aids Research	429
	An Informational Analysis of Discrete Human Communication Systems	429
	Author Index	442
