

## TABLE OF CONTENTS

Personnel	viii
Publications and Reports	xvi
Introduction	xxii

### GENERAL PHYSICS

I.	Molecular Beams	1
	Low-Temperature Helium Beam Experiment	3
	Some Aspects of the Theory and Measurement of Frequency Fluctuations in Frequency Standards	4
II.	Microwave Spectroscopy	5
III.	Radio Astronomy	7
IV.	Optical and Infrared Spectroscopy	9
	Lattice Vibrational Properties of Hexagonal CdSe	11
V.	Ultrasonic Properties of Solids	13
	Ultrasonic Attenuation in Ammonium Chloride	13
VI.	Geophysical Research	17
	High Magnetic Fields	17
	Upper Atmospheric Physics	17
	Electromagnetic Back-Scattering from Spheres	17
	Search for Comet Ikeya-Seki (1965f) at 8 Gc/sec and 15 Gc/sec	18
VII.	Gravitation Research	21
	Long-Term Frequency Stabilization of a Laser Employing a Molecular or Atomic Beam as Primary Frequency Reference	22
	Collision Quenching of Metastable Krypton by Xenon	24
VIII.	Noise in Electron Devices	27
	Photoelectron Statistics Produced by a Laser Operating below the Threshold of Oscillation	27

## CONTENTS

IX.	Magnetic Resonance	33
X.	X-ray Diffraction Studies	35
XI.	Soft X-ray Spectroscopy	37
XII.	Physical Electronics and Surface Physics	39
	Surface Physics	39
	Valence-Level Shift of an Alkali Atom as a Result of Interacting with a Metal Surface	39
	Induced and Spontaneous Transition in Gas-Surface Interactions	43
	Effect of Thermal and Ultraviolet Radiation on Thermionic Emission from Tungsten	46
	Surface Properties of Thermionic Electrodes	51
	Free-Molecule Flow Fields	52
	Angular Distribution of Orifices and Tubes at High Knudsen Numbers	52
	Neutralization of Space Charge in Thermionic Diodes	60
	Cesium Molecular-Ion Formation by Collision of Two Excited Atoms II	60
XIII.	Physical Acoustics	75
	Dispersion Relation for Surface Waves on a Compressible Fluid	75
XIV.	Electrodynamics of Moving Media	79
	Higher Order Trapped Light-Beam Solutions	79

## PLASMA DYNAMICS

XV.	Plasma Physics	83
	Computer Programmed "Basic Data of Plasma Physics"	83
	Far Infrared Plasma Diagnostics with a Michelson Interferometer	85
	Ideal Optical Discriminator	89
XVI.	Gaseous Electronics	99
	Microwave Measurements of a Time-Dependent Electron Velocity Distribution Function	99
	Radiofrequency Dipole Resonance Probe	103

## CONTENTS

XVII.	Plasmas and Controlled Nuclear Fusion	109
	Active Plasma Systems	109
	Beam-Plasma Discharge: Excitation of Ions at the Ion Cyclotron Frequency (Theory)	111
	Beam-Plasma Discharge: Excitation of Ions at the Ion Cyclotron Frequency (Experiment)	113
	Beam-Plasma Discharge: System C	115
	Beam-Plasma Discharge: System D	117
	Energy Gain by Mirror Collisions in the Presence of a Longitudinal Traveling Wave	120
	Discrete Particle Models of the Beam-Plasma Discharge	125
	Dynamics of the Plasma Boundary	128
	Hot-Electron Plasma Decay in a Magnetic-Mirror Machine	128
	First-Order Correction to the First Adiabatic Invariant	132
	Instabilities in an Electron Beam with Transverse Energy	135
	Applied Plasma Physics Related to Controlled Nuclear Fusion	137
	Engineering Problems of Controlled Fusion	139
	Turbulent Plasma Arc Experiment	145
	Plasma and Magnetohydrodynamic Flows, Waves and Instabilities	151
	Magnetohydrodynamic Flows and Shock Waves	152
XVIII.	Energy Conversion Research	153
	Status of Research	154
XIX.	Spontaneous Radiofrequency Emission from Hot Electron Plasmas	159
	Electrostatic Plasma Instabilities at Cyclotron Harmonics	159
XX.	Interaction of Laser Radiation with Plasmas and Nonadiabatic Motion of Particles in Magnetic Fields	163

## COMMUNICATION SCIENCES AND ENGINEERING

XXI.	Statistical Communication Theory	165
	Work Completed	167
	A Subjective Study of Optimum Quantization	167
	Nonlinear Filtering of Convolved Signals	168
XXII.	Processing and Transmission of Information	177
	Truncating a Convolutional Code	180
	Simulation of Sequential Decoding for a Telemetry Channel	183

## CONTENTS

XXIII.	Artificial Intelligence	195
XXIV.	Speech Communication	197
	Real-Time Spectral Input System for Computer Analysis of Speech	197
	SPASS – An Improved Terminal Analog Speech Synthesizer	198
	Children's Learning and Recall of Grammatical and Nongram- matical Nonsense Syllables	205
	Description of Tongue Shape and Position during Vowel Articulation	208
XXV.	Linguistics	213
	On the Stoic Theory of Tenses	214
XXVI.	Cognitive Information Processing	222
	Cognitive Processes	222
	Phonological Code-Switching Time in Bilingualism	222
	Grapheme-to-Phoneme Translation of English	225
	Pattern Recognition	225
	Automatic Recognition of Sheet Music	225
XXVII.	Communications Biophysics	227
	A Method for Studying Response and Inhibition Areas of Some Single Units in the Auditory System	232
	Statistical Analysis of Electrophysiological Data from Auditory Nerve Fibers in Cat	239
	Statistical Mechanics and Field Theory	243
XXVIII.	Neurophysiology	249
	Number of Modes of Oscillation of a Net of N Neurons	253
XXIX.	Computer Research	255
	Status of Research	255
XXX.	Network Synthesis	259
	Nonreciprocity Figure of Merit for Passive Resistive Devices	259
XXXI.	Computation Research	263
	Newton's Method for Finding Complex Roots of a Trans- cendental Equation	263
	Numerical Example to Illustrate Kizner's Method for Solving Nonlinear Equations	266

## CONTENTS

XXXII. Advanced Computation Systems	269
XXXIII. Stroboscopic Light Research	271
Author Index	273
