

TABLE OF CONTENTS

Personnel	vi
Publications and Reports	xv
Introduction	xix

GENERAL PHYSICS

I.	Atomic Resonance and Scattering	1
	Magnetic Moment of the Proton	1
II.	Electron Magnetic Resonance	7
	On Geometry of Excited Molecules	7
III.	Radio Astronomy	19
	Long Baseline Interferometer Experiments	19
	Radio Interferometer	22
	MIT-NRAO Recombination Line Survey	22
	K-band Observations of Stratospheric Water Vapor	23
	Statistical Inversion of Radiometric Data	25
IV.	Solid-State Microwave Electronics	29
	High Dynamic Range Mixers	29
	Low-Noise Solid-State Receiver	29
V.	Optical and Infrared Spectroscopy	35
	Impurity-Induced Absorption in Perovskite Fluorides	35
VI.	Geophysical Research	43
	Anisotropy of the Electron Velocity Distribution in a Reflex Discharge Measured by Continuous-Wave Laser Scattering	43
VII.	Magnetic Resonance	47
	High Resolution Nuclear Magnetic Resonance in Solids	47
VIII.	Physical Electronics and Surface Physics	49
	Molecular Beam Apparatus for Investigations of Gas- Solid Interactions	49
	Equilibrium Model of the Reaction of a Gas with a Solid to Form Volatile Products: Steady-State Oxidation of Tungsten	57
IX.	Electrodynamics of Media	65
	Closed-Form Solution of Steady-State Electromagnetic Shock	65

CONTENTS

PLASMA DYNAMICS

X.	Plasma Physics	71
	Nonlinear Coupling of Low-Frequency Oscillations in an Electron-Cyclotron Resonance Discharge	71
	Nonlinear Coupling of Low-Frequency Ionization Waves	74
	Refractive Attenuation of Radiation in a Cylindrical Plasma	76
	Stochastic Acceleration in Bounded Plasmas	85
XI.	Gaseous Electronics	99
	Continuum Probe Studies of a Positive Column in Flowing Argon Gas	99
XII.	Plasmas and Controlled Nuclear Fusion	111
	Active Plasma Systems	111
	Ion Energy Analysis in a Beam-Plasma Discharge	111
	Minimum-B Mirror Magnetic Field in System A	116
	Beam-Plasma Discharge: System D	118
	Oscillations in an Inhomogeneous Cold Plasma	123
	Computer Simulation of an Inhomogeneous Plasma	127
	Further Discussion on Electron Beam Space-Charge-Wave Interaction with the Backward Wave in a Cold-Plasma Waveguide	131
	Growth of the Lossless, One-Dimensional Beam-Plasma Interaction in Space and Time	137
	Applied Plasma Physics Related to Controlled Nuclear Fusion	141
	Radiation Damage in Thermonuclear Reactors	141
	Active Plasma Effects in Solids	151
	Effects of Contacts on Low-Field Microwave Emission from Indium Antimonide Loops with Induced Electric Fields	151
	Acoustic Wave Amplification at Microwave Frequencies	156
	Collisional Effects on Acoustic-Wave Amplification at Microwave Frequencies	161
	Acoustic Wave Amplification-Transport Theory	164
	Criteria for Negative-Energy Helicon Waves	168
XIII.	Spontaneous Radiofrequency Emission from Hot-Electron Plasmas	177
	Experimental Study of Enhanced Cyclotron Radiation from an Electron-Cyclotron Resonance Discharge	177
XIV.	Interaction of Laser Radiation with Plasmas and Nonadiabatic Motion of Particles in Magnetic Fields	183
	Resonant and Near-Resonant Wave-Particle Interactions in a Transverse Plasma Wave	183

CONTENTS

COMMUNICATION SCIENCES AND ENGINEERING

XV.	Processing and Transmission of Information	193
	Error Bounds for the Turbulent Optical Channel	193
XVI.	Speech Communication	199
	Acoustic Correlates of Place of Articulation for Stop and Fricative Consonants	199
XVII.	Cognitive Information Processing	207
	Cubic Corners	207
	Surface Reconstruction from Contour Samples: Some Computer Simulation Results	215
	Field Shading and Noise in the SCAD Scanner	227
	Biological Image Processing – Automated Leukocyte Recognition	231
	Differential Leukocyte Analysis by Optical Methods	243
	Reading Machine for the Blind	245
XVIII.	Communications Biophysics	249
	Sound-Pressure Transformation by the External Ear of the Cat	250
	Investigations on the Abdominal Stretch Receptor System of Crayfish	250
	Cumulative Behavior of Averaged Potentials	253
	Hybrid Simulation of Hodgkin-Huxley Model for Nerve Membrane	258
	Author Index	267
