

## TABLE OF CONTENTS

Personnel	vi
Publications and Reports	xiv
Introduction	xvii

### GENERAL PHYSICS

I.	Interatomic Forces	1
II.	Electron Magnetic Resonance	3
	Excited States of Carbonyl Hydrocarbons	3
III.	Radio Astronomy	23
	Very Long Baseline Interferometry	23
	Pulsar Studies	24
	Pulsar Facility	25
	KU-band Interferometer	25
	Observations of OH Emission Associated with Infrared Stars	26
	Observations of Radio Emission from Galactic H <sub>2</sub> O	29
	20-Channel Digital Synchronous Detector	32
IV.	Solid-State Microwave Electronics	33
	60-GHz Mixer	33
	15-GHz Doubler	33
	Avalanche Diode Analysis	33
V.	Electrodynamics of Media	43
	Effect of Cross Relaxation on Lamb Dip	43
	Solution of Waveguide Obstacle Problems by a Finite-Difference Method	49

### PLASMA DYNAMICS

VI.	Plasmas and Controlled Nuclear Fusion	69
	Waves and Radiation	69
	Observation of Ion Acoustic Waves in Highly Ionized Plasmas in a Magnetic Field	69
	Nonlinear Coupling of Three Ion Acoustic Waves	72
	Relation between Moving Striations and Ion Acoustic Waves	84
	Nonlinear Instabilities in Multicomponent Plasmas	92
	Collisional Cyclotron Instability in a Xenon Plasma	93
	Instabilities Driven by Hot Electrons in a Magnetic Mirror	101

## CONTENTS

Plasma Diagnostics	111
Optical Measurements of Ion Temperature in a Collisionless Microwave-Generated Plasma	111
Fusion-Related Studies	117
Hazards of Tritium from Controlled Fusion	117
Pulsed Fusion Devices: Wall Heating	118
Effect of Low Fuel Burn-up in Proposed Deuterium- Tritium Fusion Reactors	122
Stability of a Relativistic Electron Layer	126
VII. Applied Plasma Research	131
Active Plasma Systems	131
Interaction of a Spiraling Electron Beam with a Plasma	131
Stability of Electron Beams with Velocity Shear	131
Plasma Effects in Solids	139
Acoustic-Wave Propagation and Amplification in InSb	139
Plasma Physics and Engineering	146
Electron-Cyclotron Resonance-Heated Plasma in a Levitron	146
Gain of a CO <sub>2</sub> Laser Amplifier in the Afterglow	147
COMMUNICATION SCIENCES AND ENGINEERING	
VIII. Processing and Transmission of Information	157
Multiple Fault Detection in Combinational Logic Networks	157
Optimal Mean-Square Estimation in Q-M Channels	159
Bounds and Approximations for Some Integral Expressions Involving Log-Normal Statistics	163
IX. Detection and Estimation Theory	177
Detection of Signals Transmitted over Doubly Spread Channels	177
An Application of State-Variable Estimation Techniques to the Detection of a Spatially Distributed Signal	193
X. Speech Communication	207
Pharyngeal Consonants	207
Prosodic Features and Children's Language Production	216
Vowel Identification and Discrimination in Isolation vs Word Context	220

## CONTENTS

XI.	Cognitive Information Processing	231
	Computer Synthesized Holograms – Two Experiments	231
	Picture Bandwidth Compression Using Fourier Analysis	238
	Impulse Response for a Lens with Seidel Aberrations	243
	Specification of the Prosodic Features of Speech	251
	"Optical Bench" Simulator	257
	Initial Studies on the Acoustic Correlates of Prosodic Features for a Reading Machine	262
	Asymptotic Rate for Fourier Series Expansion	271
XII.	Neurophysiology	279
	Operational Amplifier	279
	Author Index	287
