

## TABLE OF CONTENTS

Personnel	v
Publications and Reports	xiii
Introduction	xvii

### GENERAL PHYSICS

I.	Microwave Spectroscopy	1
	Work Completed	1
	Hydrogen Atom Addition to Solid Isobutylene at 77° K	1
II.	Radio Astronomy	3
	Pulsar Observations with a Swept-Frequency Local Oscillator	3
	Search for the 1.35-cm Stratospheric H <sub>2</sub> O Line	6
	Pulsar Observations	8
	Ku-band Interferometer	10
	Extended Bandwidth Long Baseline Interferometry	14
III.	Solid-State Microwave Electronics	17
	60-GHz Mixer	17
	Some Aspects of High Dynamic Range Amplification	18
	Intermodulation Distortion Analysis	18
IV.	Physical Electronics and Surface Physics	19
	Experimental Investigation of the Velocity Distribution of Hydrogen Molecules Desorbed from Metal Surfaces	19
V.	Physical Acoustics	27
	Ultrasonic Dispersion in Piezoelectric Semiconductors	27
	Nonlinear Interaction between a Sound Field and a Liquid Surface	30
	Nonlinear Wave Distortion of Acoustic-Noise Spectrum	37
VI.	Electrodynamics of Media	41
	Parametric Cross-Modulation Effects in Gas Lasers	41
	Parametric Effects in the Helium-Neon Gas Laser	46
	Use of Addition Theorems for Electromagnetic Field Synthesis on Circular Cylinders and Spheres	49
	Quantization of Electromagnetic Radiation Fields in Moving Uniaxial Media	55

## CONTENTS

### PLASMA DYNAMICS

VII. Plasmas and Controlled Nuclear Fusion	57
Waves and Radiation	57
Anomalous Cyclotron Radiation	57
VIII. Applied Plasma Research	65
Active Plasma Systems	65
Stability of Electron Beams with Velocity Shear	65

### COMMUNICATION SCIENCES AND ENGINEERING

IX. Speech Communication	69
Speech and Audio Computer-Aided Examination and Analysis Facility	69
TASS – Another Terminal Analog Speech Synthesis System	73
A Facility for Studying Perception of Timing in Natural Speech	81
X. Linguistics	85
On the Inappropriateness of Rule Features	85
XI. Cognitive Information Processing	95
Moiré Patterns in Sampling Halftone Pictures	95
Holography and Imaging of Three-Dimensional Objects	101
Survey of Type Font Usage	105
XII. Communications Biophysics	109
Current Noise in Nerve Membrane: Some Comments on Measurement Techniques	110
Comparison of Two Models Relating the Resting Membrane Potential of Squid Axon to Ion Concentrations	116
Alternate Route for Acoustic Stimulation of a Lizard Inner Ear	121
Automated System to Control Stimulus and Measure Response Variables in Experiments on the Auditory System	122
Psychophysics	127
Experiments on Binaural Hearing	127
Interaural Time Discrimination	127
Monaural Detection with Contralateral Cueing	130
Instrumentation	131
Four-Quadrant Multiplier	131
Solid-State Random Noise Generator	131
Feasibility of Electronic Spoofing of Bat Sonar	131
Author Index	135
