

TABLE OF CONTENTS

Personnel	vi
Publications and Reports	xv
Introduction	xx

GENERAL PHYSICS

I.	Microwave Spectroscopy	1
	Work Completed	1
	Measurement of the Electric Contribution to Ultrasonic Attenuation in a Tin Film at 9 GHz	1
	Metallic Conduction	1
	Geometric Dispersion of Incoherent Phonon Pulses in Quartz	2
II.	Radio Astronomy	7
	Pulsar Observations	7
III.	Solid-State Microwave Electronics	13
	Microwave Frequency Doubler	13
	Theory of Resistive Mixers	13
	Avalanche Diode Amplifiers	14
IV.	Electronic Instrumentation	15
	Status of Research	15
V.	Physical Electronics and Surface Physics	17
	Experimental Measurements of the Spatial Distribution of H ₂ and D ₂ Desorbed from a Nickel Surface	17
VI.	Physical Acoustics	29
	Ultrasonic Dispersion in Piezoelectric Semiconductors	29
	Nonlinear Sound Transmission through an Orifice	31
VII.	Electrodynamics of Media	37
	Examination of Self-Sustained Optical Pulses	37

CONTENTS

PLASMA DYNAMICS

VIII. Plasmas and Controlled Nuclear Fusion	45
Waves and Radiation	45
Harmonic Generation by an Antenna Immersed in a Plasma	45
Radiofrequency Absorption in Plasmas	46
High-Temperature Toroidal Plasmas	50
Alcator Experiment	50
Destruction of Flux Surfaces in Tokamaks Arising from Perturbations from Axisymmetry	61
Plasma Instability in an Electric Field	65
IX. Applied Plasma Research	69
Active Plasma Systems	69
Stability of Electron Beams with Velocity Shear	69
Plasma Effects in Solids	77
Model for the Microwave Emission from the Bulk of n-Type InSb	77
Plasma Physics and Engineering	84
Electron Cyclotron Resonance Heated Plasma in a Levitron	84
Quiescent Radiofrequency Plasma Experiment	92

COMMUNICATION SCIENCES AND ENGINEERING

X. Processing and Transmission of Information	105
Waveform Estimators for the Turbulent Atmospheric Optical Channel	105
XI. Detection and Estimation Theory	113
Preliminary Results on Performance Bounds for the Detection of Stochastic Signals in Additive White Gaussian Noise	113
XII. Speech Communication	125
Choice of Speaker Recognition Parameters	125
XIII. Linguistics	135
On "Gapping and the Order of Constituents"	135

CONTENTS

XIV.	Cognitive Information Processing	145
	Sinc^n – A Family of Window Functions	145
	Relevance of Psychology to Character Recognition	150
	Source Rate for a Signal Corrupted by Noise	152
	Model for Therapeutic Diagnosis of Disease	158
	Leukocyte Locating Procedure	166
	Discrimination Algorithm for the Normal and Suspicious Cells of the Papanicolaou Smear	171
XV.	Communications Biophysics	173
	Statistical Relationships between the Firing Patterns of Two Auditory-Nerve Fibers	173
XVI.	Signal Processing	181
	First-Passage Time Statistics of a First-Order Markov Process with a Linear Ramp	181
	Discrete Representations of Analog Signals	185
	Nonlinear Processing of Signal Envelopes	190
XVII.	Digital System Design Automation	193
	Machine-Aided Digital System Design Language (DSL/1)	193
	Author Index	201
