

## TABLE OF CONTENTS

Personnel	vi
Publications and Reports	xiv
Introduction	xix

### GENERAL PHYSICS

I.	Molecular Beams	1
	Diffusion of He <sup>3</sup> in Superfluid Background	3
	Field Distribution Measurements by the Atomic-Beam Method	7
II.	Microwave Spectroscopy	9
	Flux-Flow Noise in Superconducting Bolometers	10
III.	Atomic Resonance and Scattering	13
	Alkali-Molecule Scattering – Preliminary Results	13
	Effect of Binding on the Magnetic Moment of the Electron	16
	Molecular-Beam Studies of Van der Waals Molecules	20
	Merging Atomic Beams	24
	Metastable Helium Source	26
	Multiple-Resolution Velocity Selector	27
IV.	Interatomic Forces	31
V.	Radio Astronomy	33
	Search for the $2^2P_{3/2} \rightarrow 2^2S_{1/2}$ Line of Interstellar Hydrogen	34
	Effects of Clouds on Indirect Sensing of Atmospheric Temperature	39
	Optical Stellar Interferometer	44
VI.	Solid-State Microwave Electronics	47
	Instrumentation – Status of Research	47
	Experimental Broadband Mixer	48
VII.	Cooperative Phenomena in Solids and Fluids	49
VIII.	Gravitation Research	51
	Monolithic Capacitive Grid Interference Filters for the Far Infrared	52
	Far Infrared Detection by Parametric Up-conversion	54

## CONTENTS

IX.	Magnetic Resonance	59
X.	Physical Electronics and Surface Physics	61
XI.	Physical Acoustics	63
	The Possibility of Resonance Dispersion of Hypersonic Waves in Liquids	63
	Interaction of Acoustic Surface Waves with Electron Surface Waves	67
	Techniques for Measuring Density Fluctuations in Jets	70
XII.	Electrodynamics of Media	73
XIII.	Laser Applications	75

## PLASMA DYNAMICS

XIV.	Plasmas and Controlled Nuclear Fusion	79
	Waves and Radiation	79
	Linear and Nonlinear Response of a Plasma Sheath to RF Potentials	79
	New Views on the Self-Consistent Electrostatic Problem	90
	Diffusion and Turbulence	99
	Superconducting Quadrupole Magnet	100
	Plasma Diagnostics	105
	Optical Satellites Induced in a Plasma through the Action of Intense, High-Frequency Electric Fields	105
	Fusion-Related Studies	112
	Feedback Stabilization	113
	High-Temperature Toroidal Plasmas	114
	Density Expansion of the Exact Master Equation	115
XV.	Gaseous Electronics	119
	Time-Dependent Characteristics of Pulsed Ion Lasers	119
	Electron Density Measurements in Pulsed Argon Ion Lasers	122
XVI.	Relativistic Beams	127
XVII.	Applied Plasma Research	129
	Active Plasma Systems	129
	Plasma Physics and Engineering	131
	Plasma Effects in Solids	133
	Observation of Interaction between Acoustic Surface Waves and Electron Surface Waves	133

## CONTENTS

### COMMUNICATION SCIENCES AND ENGINEERING

XVIII.	Processing and Transmission of Information	143
	Estimation for Poisson Processes	143
	Photocount Statistics: A Representation Theorem	150
XIX.	Detection and Estimation Theory	157
	Statistical Microstructure of Random Fields Generated by Multiple-Scatter Media	158
XX.	Speech Communication	169
	The Interpersonal Context of Infant Vocalization	170
XXI.	Linguistics	177
	On the Notion 'Strong Derivational Constraint'	178
	A Consolidation Effect in Sentence Perception	182
XXII.	Cognitive Information Processing	187
XXIII.	Communications Biophysics	195
	"Paradoxical" Waves, Bone Conduction, and Cochlear Models	214
	Reduction of Muscle Noise in the Electrocardiogram	222
	Antidromic and Orthodromic Stimulation of Neurons Receiving Calyces of Held	227
XXIV.	Neurophysiology	235
XXV.	Signal Processing	239
	Frequency- and Time-Domain Analysis of Window Arrays	241
	Application of Window Functions to the Detection of a Signal in the Presence of Echoes	241
XXVI.	Digital System Design Automation	243
	Author Index	245
