

TABLE OF CONTENTS

GENERAL PHYSICS

I.	Molecule Microscopy	1
	Research Objectives and Summary of Research	1
	Scanning Pinhole Molecule Microscope (SPMM)	1
	Scanning Desorption Molecule Microscope (SDMM)	2
	Desorption Experiments Related to SDMM	2
	Molecule Fluxes through Tissue	3
	New Molecule Detectors	3
	Scanning Pinhole Molecule Microscope	4
	Preliminary Results on the Adsorption and Desorption of Water and Other Molecules on Dirty Platinum at Low Temperatures in a High-Vacuum System	5
	Chemical Measurement by Volatile Enzyme Products	9
	Thermal Enzyme Probe: A New Enzyme Transducer	16
II.	Electron Optics	21
	Research Objectives and Summary of Research	21
	High-Resolution High-Contrast Electron Optics	21
	Electron Lens Field Calculations	23
	Condenser Underfocus vs Overfocus in the Transmission Electron Microscope (TEM)	28
III.	Physical Electronics and Surface Physics	33
	Research Objectives and Summary of Research	33
	Interaction of Gases with Solids	33
IV.	Atomic Resonance and Scattering	35
	Research Objectives and Summary of Research	35
	Optical Frequency Standard	35
	New Methods for Radiation Detection	35
	Studies of Superradiance and Coherence	35
	Van der Waals Molecules	36
	Energy-Transfer Studies Using Velocity-Selected Atoms and Molecules	37
V.	Quantum Electronics	41
	Laser Applications	41
	Research Objectives and Summary of Research	41
	Long-Term Laser Frequency Stabilization Using a Molecular Beam	41

CONTENTS

Ultrahigh Resolution Spectroscopy Using Molecular Beams	41
Single-Frequency Continuous-Wave Dye Laser	42
Single-Beam Reflection Holography	42
Gaseous Lasers	44
Research Objectives and Summary of Research	44
Ultraviolet Lasers	44
CO ₂ Laser	45
Theoretical Prediction of Capillary Tube Amplifier Gain	46
Nonlinear Phenomena	57
Research Objectives and Summary of Research	57
Laser Locking over a "Wide" Frequency Range	57
Short Laser Pulses	58
Passive FM Mode Locking with a Nonlinear Refractive Index Medium	59
VI. Infrared Instrumentation and Astronomy	65
Research Objectives and Summary of Research	65
Measurement of the Isotropy of Cosmic Background Radiation in the Far Infrared	65
Heterodyne Detection in the Infrared	65
Sky Survey for Extended Sources in the Far Infrared	66
VII. Microwave and Millimeter Wave Techniques	67
Research Objectives and Summary of Research	67
Low-Temperature Millimeter Wave Receivers	67
Multiple Microwave Solid-State Devices	68
Microwave Measurements and Instrumentation	69
Very Long Baseline Interferometry (VLBI)	69
VIII. Radio Astronomy	71
Research Objectives and Summary of Research	71
Microwave Propagation in the Terrestrial Atmosphere	71
Microwave Spectroscopy of the Interstellar Medium	71
Noninvasive Sensing of Subcutaneous Temperatures Using Microwave Thermography	72
Experiments for Microwave Temperature Sounding of the Mesosphere and Upper Stratosphere	72
Environmental Sensing with Nimbus Satellite Passive Microwave Spectrometers	72
Calculation of Pressure-Broadening Effects in Oxygen Microwave Absorption	74
Atmospheric Millimeter-Wave Opacity Due to Oxygen and Water Vapor	84

CONTENTS

IX.	Electrodynamics of Media	87
	Research Objectives and Summary of Research	87
	Subsurface Probing and Communication with a Dipole Antenna	87
	Optics of Nonisotropic Media and Optical Systems	88
	Microwave Remote Sensing of the Earth	88
	Stratification Factors for the Highly Conductive Earth	90
	Vertical Electric Dipole over a Uniaxial Dielectric-Coated Conductor	91
	Mode Conversion with an Electro-optical Substrate	94
	Remote Sensing of Ice Thickness with a Radiometer	95
	Microwave Thermal Emission from Clouds	98
X.	Transport Phenomena in Solids	103
	Research Objectives and Summary of Research	103
XI.	Physical Acoustics	105
	Research Objectives and Summary of Research	105
	Emission of Higher Order Acoustic Modes into a Moving Fluid in a Duct	105
	Acoustically Induced Instabilities of Control Valves	105
XII.	Gravitation Research	107
	Research Objectives and Summary of Research	107

PLASMA DYNAMICS

XIII.	Plasma Dynamics	111
	Confinement Systems	112
	Research Objectives and Summary of Research	112
	Physics of High-Temperature Plasmas	112
	Laser-Plasma Interactions	113
	Research Objectives and Summary of Research	113
	Three-Dimensional Dispersion Relations for Third-Order Laser-Plasma Interactions. II	114
	Three-Dimensional Pulse Response for Wave-Wave Interactions in the Presence of Inhomogeneity	121
	Symbolic Computation for Plasma Dynamics Problems	133
	Research Objectives and Summary of Research	133
	Intense Relativistic Beam-Plasma Interactions	135
	Research Objectives and Summary of Research	135

CONTENTS

Fusion Technology Studies	136
Research Objectives and Summary of Research	136
Fission-Fusion Symbiosis	136
High-Intensity Neutron Source	136
Pellet Fueling of Fusion Reactors	137
Experimental Studies – Waves, Turbulence, and Radiation	138
Research Objectives and Summary of Research	138
Plasma Diagnostics	138
Coherent Scattering Experiment: Scattering of 10.6 μm Radiation	139
Linear Quadrupole Experiment: Plasma Equilibrium and Stability in Inhomogeneous Magnetic Fields	139
Strong Nonlinear Wave-Particle Effects	139
Parametric Instabilities in Beam-Plasma Interaction	140
Nonlinear Saturation Experiment	140
Trapped-Particle Experiment	140
Parametric Decay Instability as a Possible Saturation Mechanism in a Weak Beam-Plasma System	141
General Theory	160
Research Objectives and Summary of Research	160
Toroidal Transport Theory	160
Radio-Frequency Heating of Tokamak Plasmas	161
High-Frequency Microinstabilities in Tokamak Plasmas	161
A General Treatment of Resonance Broadening in Plasmas	163
Three-Dimensional Three-Wave and Four-Wave Coupling Coefficients for Magnetized Warm-Fluid Plasma with Drifts	172
Whistler Wave Excitation and Its Parametric Down-Conversion to Electrostatic Ion Cyclotron Waves	184

COMMUNICATION SCIENCES AND ENGINEERING

XIV. Processing and Transmission of Information	207
Research Objectives and Summary of Research	207
Optical Communication	207
Complexity of Networks and Algorithms	210
Information Theory of Data Processing Systems	210
Generalized Coherent States: Statistics of Two-Photon Lasers and Elimination of Quantum Noise	211
Estimation with Feedback for Doubly Stochastic Poisson Processes	216

CONTENTS

XV.	Detection and Estimation Theory	225
	Research Objectives and Summary of Research	225
	Tracking of Narrow-Band Space/Time Signals with Adaptive Arrays	225
	Detection and Estimation Theory Methods	225
	Seismic Data Processing for the IDOE East Atlantic Continental Margin Program	225
	Multichannel Array for Seismic Data Acquisition	226
	Theses Submitted	227
XVI.	Digital Signal Processing	229
	Research Objectives and Summary of Research	229
	Speed Transformation of Speech	229
	Enhancement of Degraded Speech	230
	Spectral Zeros in Linear Prediction	230
	Implementation of a Programmable Digital Filter	230
	Seismic Data Analysis Using Homomorphic Filtering	231
	Two-Dimensional Digital Filter Design	231
	Analysis and Design of Digital Filter Structures	231
	Small Signal Processor	232
	Comparison of Digital Filter Structures on the Basis of Coefficient Word Length	233
XVI.	Speech Communication	247
	Research Objectives and Summary of Research	247
	Studies of Speech Production and Perception	247
	Acoustic Studies of Speech Sounds: Invariant Attributes and Speaker Differences	249
	Computer-Aided Signal Processing: Higher Level Dialogues and Systems for Signal Processing	250
	Further Note on French Prosody	251
	Electromyographic Study of Intonational Attributes	261
	Acoustic Characteristics of Vowel Nasalization	270
XVIII.	Linguistics	275
	Research Objectives	275
	Pi ka pu: The Perception of Speech Sounds by Prelinguistic Infants	277
XIX.	Cognitive Information Processing	285
	Research Objectives and Summary of Research	285
	Audio Response Unit for Remote Terminals	285
	Font-Independent Character Recognition	286

CONTENTS

Automatic Analysis of Hemagglutination	289
Measurement of Cellular Adhesion	290
Pattern Classification Error Bounds	291
Precise Transmission and Duplication of Radiographs	293
Roentgen Diagnostic Error Study Project	294
Digital Wirephoto System	294
XX. Communications Biophysics	297
Signal Transmission in the Auditory System	297
Research Objectives and Summary of Research	297
Auditory Psychophysics	301
Research Objectives and Summary of Research	301
Intensity Perception and Loudness	301
Binaural Hearing	303
Hearing Aids	304
Musical Pitch	305
Musical Acoustics	306
Localization and Signal Separation	307
Transduction Mechanisms in Lateral Line and Vestibular Organs	309
Research Objectives and Summary of Research	309
Studies of Receptor Potentials in Lateral Line Hair Cells	309
Studies of Transduction in the Semicircular Canals of Fish	309
Development of a Quantitative Vestibular/Neurological Test Battery	311
Biomedical Engineering	312
Research Objectives and Summary of Research	312
A Contraction Sequence Controller for Isolated Cardiac Muscle Experiments	312
Cardiac Electrophysiology	314
An Arrhythmia Analysis System for Ambulatory Subjects	315
XXI. Neurophysiology	317
Research Objectives and Summary of Research	317
Membrane Processes	317
Metabolic Processes in Nervous Tissue	318
Substantia Gelatinosa in Spinal Cord	319

CONTENTS

Behavior of Pigment Epithelium of Frog	320
Electrophysiological Study of Behavior in Stentor	320
Color Vision	320
Visual Systems in Pigeons	321
Mechanism and Occasion of Color Change in Flounder	321
Prosthetic Vocal Cords	321
Publications and Reports	323
Personnel	336
Author Index	343
Research Support Index	345
