Phonology allows us to...

- make predictions about the kinds of languages we'll find (Polish, but hopefully not Qolish or Rolish)

Phonology allows us to...

- make predictions about the kinds of languages we'll find (Polish, but hopefully not Qolish or Rolish)
- make predictions about what kinds of words we'll find in a language (e.g., Polish can't have a word pronounced "**kid**")

Phonology allows us to...

- make predictions about the kinds of languages we'll find (Polish, but hopefully not Qolish or Rolish)
- make predictions about what kinds of words we'll find in a language (e.g., Polish can't have a word pronounced "**kid**")
- make predictions about how speakers will respond when asked about the behavior of new words (e.g., if we tell a Polish speaker "These are **kidi**," and ask her for the singular, she'll say "**Kit**")

lút-nó
the winner!

Conclusions:

- Rules are best stated in terms of features.
(i.e., not **g**-->**k**...
but [-sonorant]-->[-voice])
- Rules may be ordered.
- The Underlying Representation (UR) can be abstract.

Chukchee: fun with abstract URs

ergative language, like **Inuktitut**:

Inuktitut

Arna **-p** angut takuvaa [*transitive*]

woman **ERG** man-**ABS** saw

‘The woman saw the man’

Arnat mirsurput [*intransitive*]

women-**ABS** sew

‘The women are sewing’

(ergative case for subjects of transitive clauses,
absolutive case for objects of transitive clauses
and subjects of intransitives)

Chukchee

<u>abs. sg.</u>	<u>erg.</u>	
tig	tig-e	'ski'
wejem	wejem-e	'river'
rileq	rileq-e	'spine'
ηileq	ηileqe-te	'match'
milut	milute-te	'rabbit'
uwequc	uwequci-te	'husband'

Chukchee

<u>abs. sg.</u>	<u>erg.</u>		<u>UR</u>
