## COMPILER'S NOTE

This list of official departmental serial reports published in English covers the broad range of subjects pertaining to economic development; only reports on such topics as health and education have been excluded. Official monographs have also been omitted from this listing. They will be included, along with the serial publications given here, in a larger, more comprehensive bibliography on economic development in Africa south of the Sahara to be published later this year by Frederick A. Praeger.

Most of the publications have been issued by the government concerned, but those of some major private corporations have been included, since they operate with explicit government approval. Also included are official reports on Great Britain's colonies and protectorates and United Nations documents pertaining to the trust and non-self-governing territories.

The distinction has been made between fiscal years and periods of more than a year, 1956/57 designating the overlapping year, and 1956-57 a two-year period.

The reports are all those known to have been available in the United States in December 1960. The most recent issue available at that time is indicated by \* following the date at the end of most items.
