

## **Annual Report 2012**

### **Table of Contents**

#### **CHARACTERIZING FRACTURED RESERVOIRS**

- 1) Fracture characterization from attenuation of Stoneley waves across a fracture– Sudhish K. Bakku, Michael Fehler, and Daniel R. Burns.
- 2) Fluid flow property estimation from seismic scattering data– Stephen Brown and Xinding Fang.
- 3) Reservoir fracture characterizations from seismic scattered waves– Xinding Fang, Mike Fehler, Zhenya Zhu, Yingcai Zheng and Daniel Burns.
- 4) A Bayesian framework for fracture characterization from surface seismic data– S. Ahmad Zamanian, Michael Fehler, Daniel Burns.
- 5) Seismic characterization of fractured reservoirs using 3D double beams– Yingcai Zheng, Xinding Fang, Michael C. Fehler and Daniel R. Burns.
- 6) Efficient Double-Beam Characterization for Fractured Reservoir –Yingcai Zheng, Xinding Fang, Michael C. Fehler and Daniel R. Burns.

#### **BOREHOLE SCIENCE AND LOGGING WHILE DRILLING**

- 1) Predicting stress-induced anisotropy around a borehole– Xinding Fang, Michael Fehler, Zhenya Zhu, Tianrun Chen<sup>5</sup>, Stephen Brown, Arthur Cheng<sup>5</sup>, and M. Nafi Toksöz.
- 2) An approach for predicting stress-induced anisotropy around a borehole–Xinding Fang, Michael Fehler, Zhenya Zhu, Tianrun Chen<sup>5</sup>, Stephen Brown, Arthur Cheng<sup>5</sup> and M. Nafi Toksöz.
- 3) On perfectly matched layer schemes in finite difference simulations of acoustic Logging-While-Drilling–Hua Wang, Xuefeng Shang, Xinding Fang and Guo Tao<sup>7</sup>.
- 4) Multipole seismoelectric logging while drilling (LWD) for acoustic velocity measurements– Zhenya Zhu, Jun Wang<sup>12</sup> and M. Nafi Toksöz.

#### **HYDRAULIC FRACTURING, INCLUDING MICROQUAKE STUDIES**

- 1) Microseismicity location and joint anisotropic tomography with differential travel times and differential back azimuths– Junlun Li, Haijiang Zhang, William Rodi, and Nafi Toksöz.
- 2) Comparison of microearthquake locations using seismic interferometry principles– Gabriela Melo, Alison Malcolm, and Michael Fehler.
- 3) A unified framework for relative source localization using correlograms– Oleg V. Poliannikov, Michael Prange<sup>6</sup>, Alison Malcolm, MIT, and Hugues Djikpesse<sup>6</sup>.
- 4) Seismic imaging of hydraulically-stimulated fractures: A numerical study of the effect of the source Mechanism– Andrey H. Shabelansky, Alison Malcolm, Mike Fehler, and Sudhish K. Bakku.
- 5) Full-waveform based complete moment tensor inversion and source parameter estimation from downhole microseismic data for hydrofracture monitoring– Fuxion Song and M. Nafi Toksöz.

## SEISMIC MODELING, IMAGING AND (FULL-WAVEFORM) INVERSION

- 1) Modeling and suppression of near-surface scattered surface-waves–Abdulaziz M. AlMuhaidib and M. Nafi Toksöz.
- 2) Source-Indexed Migration Velocity Analysis with Global Passive Data– Scott Burdick, M.V. de Hoop<sup>1</sup>, and R.D. van der Hilst.
- 3) Surface-wave eikonal tomography for dense geophysical arrays– Pierre Gouedard, Huajian Yao, Fabien Ernst and R. D. van der Hilst.
- 4) A fast butterfly algorithm for the hyperbolic Radon transform– Jingwei Hu, Sergey Fomel<sup>4</sup>, Laurent Demanet, MIT, and Lexing Ying<sup>4</sup>.
- 5) Approximate inversion of the wave-equation Hessian via randomized matrix probing– Pierre-David Letourneau<sup>2</sup>, Laurent Demanet, MIT, and Henri Calandra<sup>3</sup>.
- 6) Reverse time migration of multiples for subsalt imaging– Yike Liu<sup>13</sup>, Xu Chang<sup>13</sup>, Degang Jin<sup>14</sup>, Ruiqing He<sup>15</sup>, Hongchuan Sun<sup>16</sup>, and Yingcai Zheng.
- 7) A multi-pass one-way method to include turning waves and multiples– Alan Richardson and Alison E. Malcolm.
- 8) Data-driven estimation of the sensitivity of target-oriented time-lapse seismic imaging to source geometry– Andrey H. Shabelansky, Alison Malcolm, and Mike Fehler.
- 9) Monitoring seismic attenuation changes using a 4D relative spectrum method in Athabasca Heavy Oil Reservoir, Canada– Andrey H. Shabelansky, Alison Malcolm, and Mike Fehler.
- 10) Nonlinear Fréchet derivative and its De Wolf approximation– Ru ShanWu<sup>17</sup>, and Yingcai Zheng.
- 11) Target-oriented time-lapse waveform inversion using virtual survey– Di Yang, Yingcai Zheng, Michael Fehler, and Alison Malcolm.
- 12) Advanced 3D Geophysical Imaging Technologies for Geothermal Resource Characterization– Haijiang Zhang<sup>8</sup>, Erika Gasperikova<sup>9</sup>, Beatrice Parker, Ari Tryggvason<sup>10</sup>, Olafur Gudmundsson<sup>10</sup>, Tim Seher, Gregory Newman<sup>9</sup>, Michael Fehler, and Knutur Arnason<sup>11</sup>.
- 13) Scholte waves generated by seafloor topography–Yingcai Zheng, Xinding Fang, Jing Liu and Michael C. Fehler.

## SEISMIC INTERFEROMETRY

- 1) Variations in earthquake rupture properties along the Gofar transform fault, East Pacific Rise– Jeffrey McGuire<sup>18</sup>, John Collins<sup>18</sup>, Pierre Gouedard, Emily Roland, Dan Lizarralde<sup>18</sup>, Margaret S. Boettcher<sup>19</sup>, Mark D. Behn<sup>18</sup> and Robert van der Hilst.
- 2) Structure of young East Pacific Rise lithosphere from ambient noise correlation analysis of fundamental- and higher-mode Scholte-Rayleigh waves– Huajian Yao<sup>20</sup>, Pierre Gouedard, John A Collins<sup>18</sup>, Jeffrey McGuire<sup>18</sup>, and Robert van der Hilst.
- 3) Crosscorrelation kernels in acoustic Green's function retrieval by wavefield correlation for point sources on a plane and a sphere–Yingcai Zheng, Yaofeng He<sup>17</sup>, and M. C. Fehler.
- 4) Seismic interferometry using non-far-field sources and removing the spurious arrival– Yingcai Zheng, Ru-Shan Wu<sup>17</sup>, Yike Liu<sup>13</sup>, and M. C. Fehler.

## GEODETIC MEASUREMENTS

- 1) Multiple aperture INSAR (MAI) with C-band and L-band data: Noise and precision– Noa Bechor Ben-Dov and Thomas A. Herring

<sup>1</sup> Purdue University

<sup>2</sup> Stanford University

<sup>3</sup> Total SA

<sup>4</sup> The University of Texas at Austin

<sup>5</sup> Halliburton

<sup>6</sup> Schlumberger-Doll Research Center

<sup>7</sup> State Key Laboratory of Petroleum Resource and Prospecting, China Univ. of Petroleum-Beijing

<sup>8</sup> University of Science and Technology of China, Hefei, China

<sup>9</sup> Lawrence Berkeley National Laboratory, Berkeley, CA

<sup>10</sup> Dept. of Earth Sciences, Uppsala University, Uppsala, Sweden

<sup>11</sup> ISOR Iceland GeoSurvey

<sup>12</sup> Harbin Institute of Technology, Harbin, China

<sup>13</sup> Chinese Academy of Sciences, Beijing China

<sup>14</sup> Sichuan Geophysical Company, CNPC, Chengdu China

<sup>15</sup> Paulsson, Inc., Los Angeles, CA

<sup>16</sup> University of Utah

<sup>17</sup> University of California at Santa Cruz

<sup>18</sup> Woods Hole Oceanographic Institute

<sup>19</sup> University of New Hampshire

<sup>20</sup> Scripps Institute of Oceanography, UC San Diego
